1. HISTORY OF THE DOCUMENT

Version	Author	Date	Comment
1.4	Lyra Collect	5/5/2021	<ul style="list-style-type: none">• Addition of details in the <i>Resources of the web service</i> chapter• Update of the <i>Step 1: Creating the seller</i> chapter: the "naf_code" code becomes "naf"
1.3	Lyra Collect	4/13/2021	Addition of details in the <i>Entering the IBANs</i> chapter.
1.2	Lyra Collect	1/28/2021	Update of the <i>Step 1: Creating the seller</i> chapter: <ul style="list-style-type: none">• Details on attributes vat_number, legal_form, economic_agent and activity_mcc.• Addition of the value list of the legal_form attribute.
1.1	Lyra Collect	12/21/2020	<ul style="list-style-type: none">• Clarifications in the chapter <i>Step 1: Creating the seller</i>.• Addition of chapters on updating the registration (PUT).<ul style="list-style-type: none">• <i>Using the external reference</i>• <i>Entering the IBANs</i>• <i>Adding, updating or deleting an IBAN</i>• <i>Updating a registration</i>• <i>Adding or updating aboard member</i>• <i>Adding, updating or deleting an activity</i>
1.0	Lyra Collect	1/20/2019	API technical documentation: creation of a seller + KYC document

This document and its contents are confidential. It is not legally binding. Any reproduction and / or distribution of all or part of this document or its content to a third party is strictly prohibited or subject to prior written authorization from Lyra Collect. All rights reserved.

2. RESOURCES OF THE WEBSERVICE

Resources	Action	HTTP method	URI
Registrations	Retrieving the list of sellers with pending registration	GET	/marketplace/{id_marketplace}/registrations
	Registering a seller	POST	/marketplace/registrations
	Adding KYC documents	POST	/marketplace/registrations/{id_registration}/documents
	Retrieving the registration status of a seller	GET	/marketplace/registrations/{id_registration}/status

3. REGISTERING A SELLER

Lyra Collect is a payment institution approved by the ACPR. For this reason, Lyra Collect must verify the identity of its clients. Seller registration is a process that consists in verifying the documents and details provided by the operator before validating the entry into a relationship with a physical (private seller) or legal (professional seller) person and their representatives following the analysis of their file by Lyra Collect.

The seller is declared in two steps, the first one consists in retrieving detailed information about the seller, and the second one consists in collecting KYC documents.

Once the seller has been declared, Lyra Collect proceeds to reviewing the documents in order to determine whether the request of entry into a relationship will be accepted.

3.1. Step 1: Creating the seller

This step allows to create the seller enrollment request by using a POST request on the resourceREGISTRATIONwith its complete information.

```
POST: https://secure.lyra.com/marketplace/registrations/
```

When a new seller is created, the following elements are controlled by the API and can provoke a 400X error code if they are not valid:

- Checking that the mandatory fields are populated
- Checking that at least one legal representative is indicated and their coordinates are specified
- Checking that each specified e-mail address is unique in the system
- Checking that one (and only one) main activity has been specified
- for each activity, an identifier must be specified (SIRET or legal_identifier)
- Checking that the activity identifiers are not duplicate in case where several activities are specified (i.e. the SIRET must be associated with only one activity).

The table below contains the fields that need to be provided when requesting to create a registration request

Check that each currency supported by the Marketplace is correctly associated with an IBAN.

Name	Description	Format	Mandatory
marketplace	Marketplace identifier	ans..36	X
reference	Technical reference of the registration	ans..255	X
description	Description of the registration	ans..255	
person_type	PM : Legal entity PP : Natural person		X
title	For natural persons: MR, MS or MRS		If person_type = PP
first_name	For natural persons: First name		If person_type= PP
last_name	For natural persons: Name		If person_type= PP
name	Name of the seller	ans..255	X

Name	Description	Format	Mandatory
trading_name	For legal entities: Trading name	ans..255	Ifperson_type=PM
nature	Legal name	ans..255	
iban	Payment IBAN	ans..34	X
vat_number	VAT number When the merchant is not subject to VAT, indicate the VAT number of the Marketplace.	ans..16	X
legal_form	Legal name of the sub-merchant. See the list of values below.	ans..4	X
economic_agent	ISO code of the agent: <ul style="list-style-type: none"> • ISO_301 for financial companies, • ISO_302 for individual entrepreneurs, • ISO_303 for private persons. 	ans..255	X
external_ref	External reference of the seller (can be used as identifier for sellers in other APIs)	ans.50	
turnover	Estimated turnover (in cents)	Numeric	X
cashout_delay	Delay for release of funds (in days)	ans..180	
address	Address of the seller's company		X
address.street_number	Street number	ans..5	
address.street	Street type	ans..255	
address.district	Address line 2	ans..127	
address.zipcode	Zip code	ans..64	X
address.city	City	ans..128	X
address.state	State/Province	ans..127	
address.country	2-letter country code (ISO 3166-1 alpha-2 code)	ans..2	X
board	Legal representative [LEGAL_REP] and list of active beneficiaries [BENEFICIARY]		At least a legal representative
board.role	Status of the individual within the company	[LEGAL_REP BENEFICIARY]	X
board.title	Title of the individual	[MR MS MRS]	X
board.first_name	First name of the individual	ans..63	X
board.last_name	Last name of the individual	ans..63	X
board.birth_date	Birthdate of the individual	Date in YYYY-MM-DD format	X
board.birth_city	Place of birth of the individual	ans..128	X
board.nationality	Nationality of the individual (ISO 3166-1 alpha-2 code of the country)	ans..2	X
board.phone_number	Phone number of the individual	ans..32	X
board.email	E-mail address of the individual	ans..150	X
board.address	Personal address of the individual (<i>Note: the same fields as for the company address are required for the address of each specified individual</i>)		X

Name	Description	Format	Mandatory
activities	List of activities of the seller		
activity.name	Shop brand	Text	X
activity.url	Website of the shop	ans..200	
activity.registration_date	Date of registration of the activity	Date in YYYY-MM-DD format	X
activity.siret	SIRET identifier of the activity	ans..14	
activity.legal_identifier	Legal identifier of the activity	ans..20	
activity.mcc	MCC (Merchant Category Code) Example: 7997 for leisure clubs	ans..4	X
activity.naf	NAF code	ans..5	
activity.is_principal	Indicates whether this is the seller's main activity	[true false]	X

    }
  ]
}
```

}

]

3.2. Step 2: Adding KYC documents (upload)

This step will allow you to collect KYC documents in view of validating the seller.

The API supports several document types and parameters depending on each type.

The files are uploaded one by one by POSTing a **multipart/form-data** object to the **DOCUMENT** resource.

```
POST : https://secure.lyra.com/marketplace/registrations/{id_registration}/documents
```

The **form-data** object consists of a list of key-value pairs.

Key	Description	Format	Mandatory
file	The file to upload	file (image or PDF)	X
type	Type of KYC document	enum	X
reference	Technical reference of the document	ans..255	X
description	Description of the document	ans..255	
board_member	Person associated with the document	an-..36	Mandatory for identity documents and the address*

Types of KYC documents: IDENTITY_CARD, PASSPORT, RESIDENCE_PERMIT, IBAN, JDD, KBIS*

For identity documents (IDENTITY_CARD, PASSPORT, RESIDENCE_PERMIT) and proof of address (JDD), you must indicate the person associated with the document by specifying their UUID generated during seller creation (see the JSON response returned in step 1).

This board_member field cannot be used for other types of documents.

Documents of KBIS type are automatically associated with the main activity of the seller.

IBAN documents are associated with the account of the currency supported by the marketplace, i.e. euro.

Example of a POST DOCUMENT

The screenshot shows a REST client interface with the following details:

- Method: POST
- URL: http://127.0.0.1:8000/marketplace/registrations/7c74f86c-adb6-4510-9b03-187fe4c26b2b/documents
- Body type: form-data
- Fields in the body:
 - file: Select fichiers id-validated.png
 - type: PASSPORT
 - reference: kyc00001
 - board_member: 0123b9ad-4ed0-4862-bd96-a4016a28fc86

Example of a response of the POST DOCUMENT below

```
{
  "uuid": "e068f25e-5c84-4c81-8d08-171a38be1762",
  "created_at": "2018-12-04T12:58:13.350525Z",
  "updated_at": "2018-12-04T12:58:22.189227Z",
  "registration": "7c74f86c-adb6-4510-9b03-187fe4c26b2b",
  "board_member": "0123b9ad-4ed0-4862-bd96-a4016a28fc86",
  "type": "PASSPORT",
  "reference": "kyc00001",
  "description": null,
  "status": "CREATED",
  "ep_document_code": "4028a18167747aad0167794c3cbe037e"
}
```

3.3. Step 3: Viewing the status of registration request

This step allows to follow up the request by viewing the status of the REGISTRATION resource via a GET

```
GET : https://secure.lyra.com/marketplace/registrations/{identifiant}/status
```

Throughout its lifecycle, a registration request can have the following statuses:

- **PENDING:** Registration request recorded and waiting to be validated
- **SUCCEEDED:** Registration request approved
- **FAILED:** Registration request declined

Example of a response:

```
{
  "status": "PENDING"
}
```

3.4. Using the external reference

In order to avoid having to manage the seller IDs of the Marketplace API, you can specify an external reference (your own) which you can then use in queries for order creation, cashout filters, etc.

To do this, simply add the attribute `external_ref` in the registration.

You can use up to 50 characters for this field.

For example:

```
json
{
  "external_ref": "SSL314_ANIERS"
}
```

WARNING

You can add an `external_ref` to an existing registration. However, you cannot update an already defined `external_ref`. Moreover, the value must be unique for all the sub-merchants of your Marketplace.

3.5. Entering the IBANs

An IBAN must be associated with each currency supported by the Marketplace.

There are two possible ways of doing this: using the default value for single-currency Marketplace, or the detailed value. Usually, we recommend to select the second option, which is more specific than the first. In any case, do not confuse the two options.

NOTE

For each IBAN thus defined, you must download the corresponding bank account details (see chapter [Step 2: Adding KYC documents \(upload\)](#) on page 14).

1. One default IBAN

If your Marketplace supports only one currency (e.g. Euro), you **can** save the IBAN in an `iban` attribute of the POST query body.

For example:

```
json
{
  ...
  "iban": "FR1234567890000987654000",
  ...
}
```

2. One IBAN per currency

If your Marketplace supports multiple currencies, you **must** specify the recipient account(s) by currency.

An IBAN can receive several different currencies. On the other hand, it is not possible to enter the same IBAN **several times**, be it for different currencies or for the same currency.

Enter the list of IBANs by currency as follows (e.g. for a Marketplace that supports Euro, Pound Sterling and the Swiss Franc):

```
json
{
  ...
  "ibans": [
    {
      "currencies": ["EUR", "GBP"],
      "iban": "FRFR1234567890000987654000"
    },
    {
      "currencies": ["CHF"],
      "iban": "CH12345675432199"
    }
  ],
  ...
}
```

In this example, the transfers (cashout) of orders in **Euro** and **Pounds sterling** will be transferred to the account FRFR1234567890000987654000. If the orders have been made in **Swiss francs**, they will be sent to the account CH12345675432199.

NOTE

Please note that at the time of registration, the Marketplace must support the currency in question. Otherwise, you receive an error 400 "Marketplace <marketplacename> does not support <currency> currency".

3.6. Adding, updating or deleting an IBAN

IBANs are updated upon each registration update.

Therefore, you can add, update or delete IBANs without any restrictions other than the ones described in the chapter [Entering the IBANs](#) on page 16.

3.7. Updating the registration

Using the unique identifier (*uuid*) of the registration communicated by the server response upon creation, you can modify the registration by calling the resource:

```
PUT /registrations/<registration_uuid>
```

and a query body that is almost identical to that of a registration creation. Example:

```
PUT /registrations/69098e8c-efe0-4537-90e9-20e360e6919c
```

```
json
{
  "marketplace": "d085b6bb-4b8e-4f23-b84a-c9e5fafaf3dd",
```

```

"name": "Acme Corporation",

  }
]
}

```

3.8. Adding or updating a board member

Each update request can potentially add a board member to the existing data, or change it.

If you would like to **add a board member**, simply insert a board member type object into the board attribute list.

```
json
```

```

{
  ...
  "board": [
    {
      "title": "MR",
      "first_name": "Walt E.",
      "last_name": "Coyote",
      "birth_date": "1974-09-17",
      "birth_city": "BURBANK",
      "nationality": "US",
      "role": "LEGAL_REP",
      "phone_number": "0531778899",
      "email": "willecoyote@example.com",
      "address": {
        "zipcode": "AAAAA",
        "street_number": "12",
        "country": "US",
        "street": "Warner Bros Studios",
        "city": "BURBANK"
      }
    }
  ]
  ...
}

```

In order to update an existing board member, simply specify their uuid in the object.

The unique identifier (*uuid*) of the board member is returned upon each query. You can also obtain it using a `GET /registrations/<uuid_registration> query`.

For example:

```

json
{
  ...
  "board": [
    {
      "uuid": "b48cc6c4-6927-4e67-8743-1a97eb8450f8",
      "title": "MR",
      "first_name": "Walt E.",
      "last_name": "Coyote",
      "birth_date": "1974-01-13",
      "birth_city": "BURBANK",
      "nationality": "US",
      "role": "LEGAL_REP",
      "phone number": "0531778899",
      "email": "willecoyote@wbs.com",
      "address": {
        "zipcode": "91501",
        "street_number": "12",
        "country": "US",
        "street": "Warner Bros Studios",
        "city": "BURBANK"
      }
    }
  ]
}

```

It is currently not possible to delete a board member.

3.9. Adding, updating or deleting an activity

Unlike board member, activities do not have unique identifiers and are renewed each time the registration is changed.

Therefore, you can add, update or delete activities without any restrictions other than declaring the main activity.
